

Gregory G. Davis

Gregory G. Davis is the Managing Member & Founder of Audio Engineering Services LLC.

Founded in 1999, Gregory continues to pursue a three-fold growth strategy of technical engineering, creative engineering, and product sales for AES LLC.

Gregory is one of the top recording console engineers on the planet today. His 27-years of professional experience, combined with a vast knowledge of electronics design, troubleshooting, and industry practice are unparalleled in the field. He is also an expert in broadcast audio engineering for live events.

Gregory has converted a personal interest of audio and video recording into a state-of-the-art Total Capture System for productions of a variety of types. A rapidly growing media library of impeccable quality is testament to a process which has already ignited.

Prior to founding AES LLC, Gregory held several technical management positions in AMS/Neve Inc., an industry leading console manufacturer, most recently as Vice President of Engineering and National Service Manager. Among his accomplishments at AMS/Neve, in 1992 he developed and launched the North American Neve V-Series capacitor replacement program.

Prior to AMS/Neve, Gregory held management and technical positions with Neotek Corporation and Harrison Systems Inc.

Gregory holds a Bachelor of Music from the University of Miami School of Music.
